EDUCATION

PG Diploma in IT Infrastructure, Systems and Security (PG-DITISS) <i>Networking, Linux, Python, SQL, DevOps, NDC, PKI, Cyber Forensics, Security</i>	CDAC, PUNE Feb. 2025 – Aug. 2025
Bachelor of Engineering <i>Information Technology</i>	SPPU, PUNE Jan. 2020 – July 2024

EXPERIENCE

Networking <i>IT Infrastructure, Systems and Security (PG-DITISS)</i> - Learned Core Networking Concepts: OSI/TCP-IP model, Ethernet, IP Addressing, Subnetting and Internetworking - Practiced Hands-on configuration of routers, switches, VLANs, routing protocols (RIP, OSPF, EIGRP) and ACLs - Implemented WAN technologies, NAT, PAT, IPv6, PPP, Basic networking security with AAA and port security - Explored SDN	Feb 2025 – Present CDAC, PUNE
IT Infrastructure and Management DevOps <i>IT Infrastructure, Systems and Security (PG-DITISS)</i> - Completed in-depth training on IT infrastructure, virtualization, cloud computing, data centers and DevOps practices. - Trained in DevOps methodologies with hands-on experience in building CI/CD pipelines using Jenkins, GitHub, Maven, Docker, and Nexus. - Deployed containerized applications on Kubernetes and automated infrastructure provisioning using Ansible and Terraform. - Integrated monitoring and alerting with Prometheus, Grafana, and Nagios as part of real-time deployment and observability labs.	Feb 2025 – Present CDAC, PUNE
Operating System and Administration <i>IT Infrastructure, Systems and Security (PG-DITISS)</i> - Gained Hands-on experience in Windows and Linux Server Administration, covering Active Directory, DNS, DHCP, Group Policies, Security. - Implemented Virtualization, scripting with PowerShell and Bash, Managed services like Apache, Samba, Squid, FTP, NFS, Mail server - Worked on automation using PowerShell and Bash, and managed system security, services, and deployment tools like WDS	Feb. 2025 – Present CDAC, PUNE
Network Defense and Countermeasures <i>IT Infrastructure, Systems and Security (PG-DITISS)</i> - Trained in network security concepts including firewalls, IDS/IPS, VPNs, and risk assessment. - Configured pfSense firewall, DMZ, iptables, and monitored traffic using Wireshark. Implemented VPN solutions (OpenVPN, IPsec) and simulated attack scenarios including DoS/DDoS. - Hands-on experience with Snort, Suricata, OSSEC, and ELK Stack for intrusion detection and log analysis. - Worked with Wireshark for packet analysis, Fail2ban for brute-force prevention, and reverse proxy using Squid/Nginx.	Feb 2025 – Present CDAC, PUNE
Cyber Forensics <i>IT Infrastructure, Systems and Security (PG-DITISS)</i> - Completed hands-on training in cyber forensics, covering evidence preservation, incident response, and chain of custody procedures. - Worked with tools like FTK Imager, Sysinternals Suite, OSForensics, and Hex editors for digital investigation and data recovery. - Gained exposure to live system forensics, hashing, encryption, privacy laws, and mobile forensic techniques.	Feb 2025 – Present CDAC, PUNE
Public Key Infrastructure (PKI) <i>IT Infrastructure, Systems and Security (PG-DITISS)</i>	Feb 2025 – Present CDAC, PUNE

- Completed hands-on training in PKI concepts including encryption, digital signatures, certificates, and secure authentication methods.
- Worked with tools like XCA and OpenSSL to create and manage digital certificates, HTTPS setup, and email encryption.
- Gained practical knowledge in SSL/TLS, certificate revocation, Aadhaar eSign, SSO, and Zero Trust Architecture.

Security Concepts

Feb 2025 – Present

IT Infrastructure, Systems and Security (PG-DITISS)

CDAC, PUNE

- Trained in application security and ethical hacking covering OWASP TOP 10, malware analysis, and penetration testing.
- Hands-on experience with tools like Burp Suite, Wireshark, Metasploit, Snort, and Android security testing.

PROJECTS

Intrusion Detection and Prevention System using Snort and Firewall(PG-DITISS) July 2025 – Present

- *Description:* Implement a real-time Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) using Snort, integrated with a firewall to block malicious traffic.
- Deploy Snort in IDS/IPS mode.
- Write custom Snort rules for detecting common attacks (e.g., port scans, brute force).
- Integrate with iptables or pfSense to block detected threats.
- Simulate attacks using Kali Linux (e.g., Nmap, DoS tools).

CI/CD Pipeline Implementation using Jenkins, Docker, Kubernetes

July 2025 –Present

- Implemented CI/CD pipeline using Jenkins, Maven, Docker, and Kubernetes with GitHub integration.
- Automated code quality checks (SonarQube), vulnerability scans (Trivy), and deployments to Kubernetes.
- Enabled end-to-end DevOps workflow with Nexus, Prometheus, Grafana, and KubeAudit integration.

Deep Learning Based Partially Occluded Face Recognition (BE(IT))

2023 – June 2024

- Built a real-time facial recognition system using CNN and GAN models for accurate identification.
- Implemented a mask removal detection system using a live camera feed

TECHNICAL SKILLS

Languages: Python, SQL(MySQL), Bash (Shell Scripting), PowerShell, HTML/CSS/JavaScript(Basic), YAML, Terraform HCL

Frameworks: Ansible, Terraform, Kubernetes, Zero Trust, Nagios, Prometheus, ELK Cisco Packet Tracer, Wireshark, iptables/netfilter, OpenVPN, Snort/Suricata, Active Directory, DNS, DHCP

Developer Tools: Git, GitHub, Jenkins, Docker, Nexus, FTK Imager, Apache, IIS, FreeNAS, Hyper-V, Cisco Packet Tracer, WDS (Windows Deployment Services), pfSense, OpenVPN, Wireshark, Ansible(Basic usage), Nagios, Snort/Suricata, Apache/IIS, VirtualBox/VMware/Hyper-V

Libraries: re(Regular Expressions), os/sys, socket, tcpdump, Fail2ban , iptables/netfilter, OpenSSL
